**Subject:** EtO Lab/Methods call for Feb 27

Michael/Jackie:

We have scheduled an initial EtO lab/methods call for tomorrow at 1 pm your time. It's 50-50 that we may need to reschedule as Ramboll has been late sharing their sampling data and QA. Tim Halik has been adamant about not having the call until all parties have shared their information. In that regard, we have extensive data packages for our sampling in February (passed the Doris check but not ready for posting yet) and also have data packages from GHD on behalf of Willowbrook. This is an extensive amount of lab information but I'll pass along to the both of you in case you love looking at GS/MS output files and chromatograms.
